

**John Johnson**

**PR FARMING COMPANY  
Creston BC Canada  
Truck # 103**

**Hello, my name is John Johnson. I drive for PR Farming Company out of Creston, BC Canada.**

**I have had this Hydrogen Unit on for about a month. I haul compressed bails of hay to the USA ports in the state of Washington.**

**My truck run is a 1000 mile run with a lot of good hills to go over, and my load is a 96,000 pound load, 8 tons heavier than a normal load.**

**I have gained 1/2 a gear on the hills with a full load and a full gear with an empty load or empty container.**

**Here is a record of the last 6 fillups of fuel I have done; my average MPG was 4.353 Full Load:**

<b>1- Chassis only</b>	<b>10.1 miles per gal.</b>
<b>2- Empty Container</b>	<b>5.138 miles per gal.</b>
<b>3- Full Load</b>	<b>4.980 miles per gal.</b>
<b>4- Full Load</b>	<b>5.165 miles per gal.</b>
<b>5- Full Load</b>	<b>5.130 miles per gal.</b>
<b>6- Full Load</b>	<b>5.740 miles per gal.</b>

**I am very impressed with the Hydrogen Performance Unit and recommend it for all trucks.**
